Gustavo Muzeka

Software engineer with experience in web development, IT infrastructure management, and cloud solutions integration, always seeking process optimization and cloud solution innovation.

Relevant Experiences

Developer / CEO - Chronos   Mar 2023 — Present

As a developer, I created custom websites, ensuring compliance with quality standards and deadlines, with experience in programming languages such as JavaScript and Python, and in frameworks and tools like React, jQuery, Bootstrap, Tailwind, SASS, TypeScript, WordPress, among others.

IT Analyst - Suzuki   Nov 2023 — Present

I am responsible for the company's IT department, mainly focusing on Infrastructure. My activities include user support, maintenance, updating, and modernization of the Protheus system, using APSDU, ADVPL, SQL, and Power BI. I am also responsible for managing internal contracts, network monitoring, creating SQL queries and views, configuring Active Directory, as well as hardware and software maintenance. I handle the configuration and monitoring of IP telephony. Additionally, I developed and implemented a new website for the company, using technologies like WordPress, WooCommerce, and Elementor.

IT Manager - Folk   Sep 2021 — Apr 2022

IT Support   Oct 2019 — Sep 2021

I supervised and led an IT team composed of 8 people. I was responsible for developing and executing IT strategies focused on innovation and efficiency. I managed IT implementation projects in condominiums, from planning to successful implementation, as well as configuring and maintaining CCTV systems. I provided technical support, both remotely and on-site, for clients, offering guidance, training, and assistance in operating the CCTV systems. I also provided technical support for employees, resolving hardware, software, and network connectivity issues, as well as configuring, maintaining, and troubleshooting workstations, printers, and mobile devices. I created SQL queries and views for process optimization.
